

SAFETY WALKAROUND CHECKLIST NOISE

1994

Date Prepared: Location: Project Name/No: Check the box if the statement is true. Fill in the blanks where the ____ appears. **NOTES** HAZARD IDENTIFICATION, REDUCTION, AND WORKER TRAINING ☐ The company has a written Injury and Illness Prevention Program (IIPP) that meets all Cal/OSHA requirements. It includes identification of noise hazards on the site, regular inspections, accident investigation, and correction of hazardous conditions. [1509] ☐ Operations or equipment that are likely to produce a noise hazard have been identified. [1509] *Has noise monitoring been done on this site?* \square Yes \square No Results (locations and dB levels): ☐ Workers have been informed of the results of noise monitoring performed on themselves, in their work area, and/or for their trade. [3204(e)(2)(A)] ☐ Exposure has been reduced as much as possible by providing quieter equipment, modifying processes, installing sound barriers, or rotating employees. [5096(b)] ☐ Workers have been trained about the hazards of noise exposure and the means they can take to prevent hearing loss. [1509]

EAR PROTECTION

If employees may be exposed to noise in excess of the Cal/OSHA permissible exposure limit (PEL) of 90 dB, appropriate ear protection is provided and workers are required to use it. [1521 and 5096(b)]	
The ear protection provided (ear plugs, ear muffs, etc.) is effective—it is sufficient to reduce noise exposure to a level below the PEL. [5096(b)]	
If disposable ear plugs are used, a sufficient supply is kept on site, and workers are instructed to change them when they become dirty.	
\square Ear protection devices fit the worker and are reasonably comfortable. [1514]
